

Job Title: Senior Backend Developer

Location: Vashi, Navi Mumbai

Company: Grexa AI Pvt Ltd

Role Overview

We are looking for a **Senior Backend Developer** with strong expertise in **GoLang, MongoDB, and Kubernetes** to build and optimize scalable backend services that power our AI Marketing Agents.

Key Responsibilities

- Develop and maintain high-performance backend systems using **GoLang**.
- Optimize **MongoDB** queries, indexes, and schema design for scalability.
- Deploy, manage, and scale services using **Kubernetes** on **GCP/AWS**.
- Implement **OAuth2-based authentication, API security, and authorization**.
- Write and maintain **RESTful APIs** and integrate with AI-powered services.
- Set up **monitoring (Prometheus, Kibana)** and **CI/CD** pipelines for efficient deployments.
- Ensure high availability, fault tolerance, and security of backend services.

Requirements

- **2.5+ years** of backend development experience.
- Strong expertise in **GoLang, MongoDB, and Kubernetes** (mandatory).
- Experience with **Docker, GCP/AWS, and microservices architecture**.
- Proficiency in **OAuth2, API authentication, and security best practices**.
- Familiarity with **Prometheus, Kibana, or similar monitoring tools**.
- Experience in **CI/CD pipelines and DevOps best practices**.
- Strong problem-solving skills and ability to work in a fast-paced startup environment.

Nice to Have

- **AI Agent Building Experience** (LLMs, conversational AI, or AI-driven automation).
- **gRPC and Protocol Buffers (ProtoBufs)** for efficient service communication.
- Experience with **PostgreSQL or other relational databases**.
